## **DETAILED ACTION**

### **Drawings**

1. The drawings are objected to because the unlabeled boxes of figures 2 and 3 should be provided with descriptive text.

### ***Allowable Subject Matter***

2. Claims 13-24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Applicant's invention is drawn to a system for providing file transfer between a remote server and a local server. To accomplish the above function according to the present invention, there is provided a system and method for providing an associated user with access to a file via plurality of local servers that is necessary when a user is temporarily connected to a local server different from a remote home server to which the user is usually connected.

Applicant's independent claims 13 and 19 each recite, *inter alia*, a system and method for receiving a first request for a file from the associated user via a first local server of a plurality of local servers comprising; storing a remotely logged table; identifying a second local server of the plurality of local servers utilizing data of an entry corresponding to the file within the remotely logged table; providing the file to the user via the first local server in response to an identification of the second local server, wherein the means for providing comprises means for issuing a second request for the file to the second local server, means for receiving a response to the second request from the second local server, and means for deleting the data of the entry

corresponding to the file within the remotely logged client table in response to a provision of the file to the user. These steps, in combination with the remaining steps of claims 13 and 19 are neither taught nor suggested by the prior art.

4. The closest prior art:

Shannon U.S. Patent No 5,852,713 discloses a computer file backup method that provides for backing up and periodically updating information on personal computers with the server computer located in a remote geographical location, the computers being connected by a network system. Shannon discloses means to transmit from a client computer and to receive and store in the storage of the server computer, the added or modified client data files, and to remove the deleted client data files to provide a stored, revised, updated, client logical disk image in the server storage means. Shannon does not disclose means for deleting an entry corresponding to the file within the remotely logged client table in response to a provision of the file to the user.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
